**Subject:** Now I see why the email has been VERY quiet tonight; I think mine is down!

Yikes--I really, REALLY hope that I didn't miss anything that I needed to post! I've been sending people messages, but I don't think they got through.

I sent an update message to Jeff Morin and Danny Hart, but I happened to catch that NOTHING is going out from my email, and I don't think I'm able to RECEIVE emails, either! I hope it's just a temporary glitch!

So...Here's what I sent Jeff and Danny just now (and I guess I'll go home since it's well into morning on the East Coast, so anything I didn't post tonight will have to wait until morning in DC, anyway...):

---

All is VERY quiet right now.

1. Melissa Harrison said that we are still waiting on water quality data from Region 9, but I haven't heard a peep from anyone in a really long time. She was pretty sure that it wouldn't be done until Saturday, and it's VERY much looking that way right now since it's now after 3AM Eastern time. I sent Melissa another email about an hour ago, and I didn't hear back, so hopefully she is getting some much-needed rest! In fact, I might miss the media call in the morning; I was hopped up on caffeine last night since I thought I'd be here until 4AM. And I ended up being awake until, well, 4AM. ☺

2. I'm still waiting for badly needed updated numbers on this page:

<http://www2.epa.gov/goldkingmine/roles-epa-and-other-responders-after-2015-gold-king-mine-release>

As you know, the numbers are all much, much higher now. Lisa McClain-Vanderpool will hopefully have those numbers early on Saturday.

3. Region 8 attorneys are working on contract documents on which we are making redactions (Suzanne Bohan (303-312-6925), Kelcey Land (303-312-6393) and Bob Ward (303-312-7100) would be the best contacts for that; Suzanne Bohan is Region 8's Enforcement ARA, and Bob Ward is Region 8's Regional Counsel.

4. Regarding the FAQ page you're working on that will get posted under the Data and Information section, Cynthia Peterson (303-312-6879, although I think she's in Durango) might be a great contact.

5. I love your idea of having a naming convention for data files, including using state-centric language (HQ keeps saying R8, R9, R6, etc).

6. You have the email from Dan Burgo regarding the GIS-enabled Public Viewer, but I'll copy it below so that you don't have to sift through a million emails.

That's all I know for now!

Thanks,

Tim

From Dan Burgo:

Based on the conference call with Eric Delgado, Marty McComb, and myself I am codifying some of the points we discussed.

The OPS viewer url and login info is below. This viewer is a more robust version of the Public Version.

<https://gis.eparm.net/goldkingops/#/-107.8340/37.2698/12>

user= gkreoc

pass= Responder15

The tentative timeline for the viewer will be tomorrow morning for a slimmed down version of the Public Viewer by tomorrow morning. It will contain locations and data displayed that have been submitted to HQ in the three links – trend graphs, analytical link, and water quality. The tool, SADIE, that is in the OPS viewer is going to be replaced with a webpage based analytical report. Over the course of a few days (possibly by Monday) we will finished QC'ing the latest monitoring data and working through the data differences between the three regions.

Eric/Marty/Janine,

If there is anything you want to add or about this please chime in.

Thanks everyone,

Dan
